

Rapala®

2020 CANADIAN EXCLUSIVE LISTINGS

Rapala® facts!

You don't start off with "Becoming a Legend" as your goal. Lauri Rapala certainly didn't. All he wanted to do was put dinner on the table for his family the easiest way possible. A piece of bark, a carving knife, old gum wrappers and some ingenuity set the wheels in motion. 80+ years later those wheels are well down the highway with a pile of "Legendary" in tow.

There are the stories we all know. Then there are the "Facts" that keep Rapala® the brand anglers the world over have come to count on.

RAPALA FACTS

.

1936

As Lauri rowed across Lake Päijänne in Finland, tending his nets, he watched as large predators burst through schools of baitfish to devour a weakened "wounded" minnow. The secret is discovered.

Balsa

The first lures Lauri built were cedar bark. Before long balsa became the wood of choice. It made the lure more buoyant and added action to the presentation. For decades Rapala has been the largest consumer of premium sustainable balsa in the world.

Hand Tuned Tank Tested

To ensure every lure swims just like the first ones every Rapala with a swimming lip, yes every one, is hand-tuned and tank-tested for perfection right-out-of-the-box. 1936 A.D.

World Records

Rapala once again took top spot in 2016 for World Records with 14 IGFA accredited awards. The total World Records caught on Rapala lures is now 510, creating another milestone... the "World Record for World Records."

100,000

To meet the demand worldwide for the world's favorite lures, the Rapala factory teams produce 100,000 lures every day of the week. Original Floating to the BX Brat, they keep 'em coming.

36/140

Offices in 36 countries provide Rapala and Respected Brands products to 140 countries across the globe. Top to bottom, there's a Rapala for everyone.

Rapala® freshwater rods

REDEFINING FISHING RODS...

Quite simply, Rapala® rods are designed to redefine the conventional concept of fishing rods. Our evolution of manufacturing and design delivers high-end performance. This is what Rapala is all about, the new age of fishing rods.

DESIGNED AND TESTED FOR EXTREME PERFORMANCE.

We've created a rod range specifically designed for today's most popular angling techniques. What makes them special?

Perfect blank materials, rod components, actions and taper designs are custom matched to provide anglers with the "tools" they need. Powerful tapers and fast tips generate rod speed for longer casts and for hook setting power. Cosmetically, each individual rod series are simply stunning, with custom graphics and rod accents that are normally reserved to custom built rods, we've made these rods look as good as they perform.

PUTTING OUR STAMP ON FISHING ROD DESIGN.

CONCEPT

• • • • •

Rapala® Concept Ti™ rods are a culmination of the highest-end Titanium components with the newest state-of-the-art NTi2 Nano-Resin Technology Composites blanks. This combination makes them one of the lightest, strongest fishing rods on the market today.

• • • • •

Overall, the design of the rods maintain maximum stability throughout the casting motion which increases the accuracy of casts, complimented by increased casting speeds and overall sensitivity. A truly efficient tool.

- CONSTRUCTION**

 - NTi2 Nano-Technology
 - 40 Ton high modulus graphite blank
- REEL SEAT**

 - Fuji® SK2 minimalist reel seats provide extreme lightweight and comfort
- GUIDES**

 - Fuji® Torzite guide inserts with K-Series titanium frames
- HANDLE MATERIAL**

 - Premium high-density Hypalon EVA handle
- ANGLER BENEFITS**

 - State of the art Nano-Resin technology makes the blank lighter, stronger and more durable.
 - Extra-fast action tapers account for longer more accurate casts and incredible hook setting power.
 - Advanced X-Grip™ Technology. Comfort and Balance are created with the custom Rapala® Split-Grip Reel Seat Design.
- Hypalon EVA handle. is extremely lightweight and durable, and offers the angler less hand and wrist fatigue than other materials.
 - Fuji® Titanium Frame K-Series Tangle-Free Concept Guide System prevent braided lines from wrapping and knotting around the guide frame.
 - Fuji® Torzite™ guide rings are extremely smooth and durable and provide virtually frictionless casting.

R-TYPE MUSKY

.....

R-TYPE IN-LINE PLANER / TROLLING

.....

The Future of Musky Rods is Here! R-Type™ Musky Series rods are available in models that handle most popular musky angling techniques and lures.

.....

Extra long handles offer leverage when casting magnum size lures and when fighting fish at boat side. R-Type™ Musky series rods are designed to throw, troll and buzz and jerk all of the popular specialized musky baits including large bucktails, cowgirls, bull-dawgs, swimbaits, jerkbaits , glide baits and large crankbaits.

R-Type™ In-Line Board Series rods are designed specifically for trolling with In-line style planer boards, large mast-style planer boards and for running Luhr Jensen® Jet Diver's™. These rods also excel when flat-lining crankbaits, spoons and even for hot-shotting in current.

.....

Specialized in design, but by nature these are a very versatile trolling rods. The sensitive tips allow an angler to quickly identify when a plug is swimming properly , when a fish is hooked or when weed has fouled the lure.

Rapala® Fishing Reels

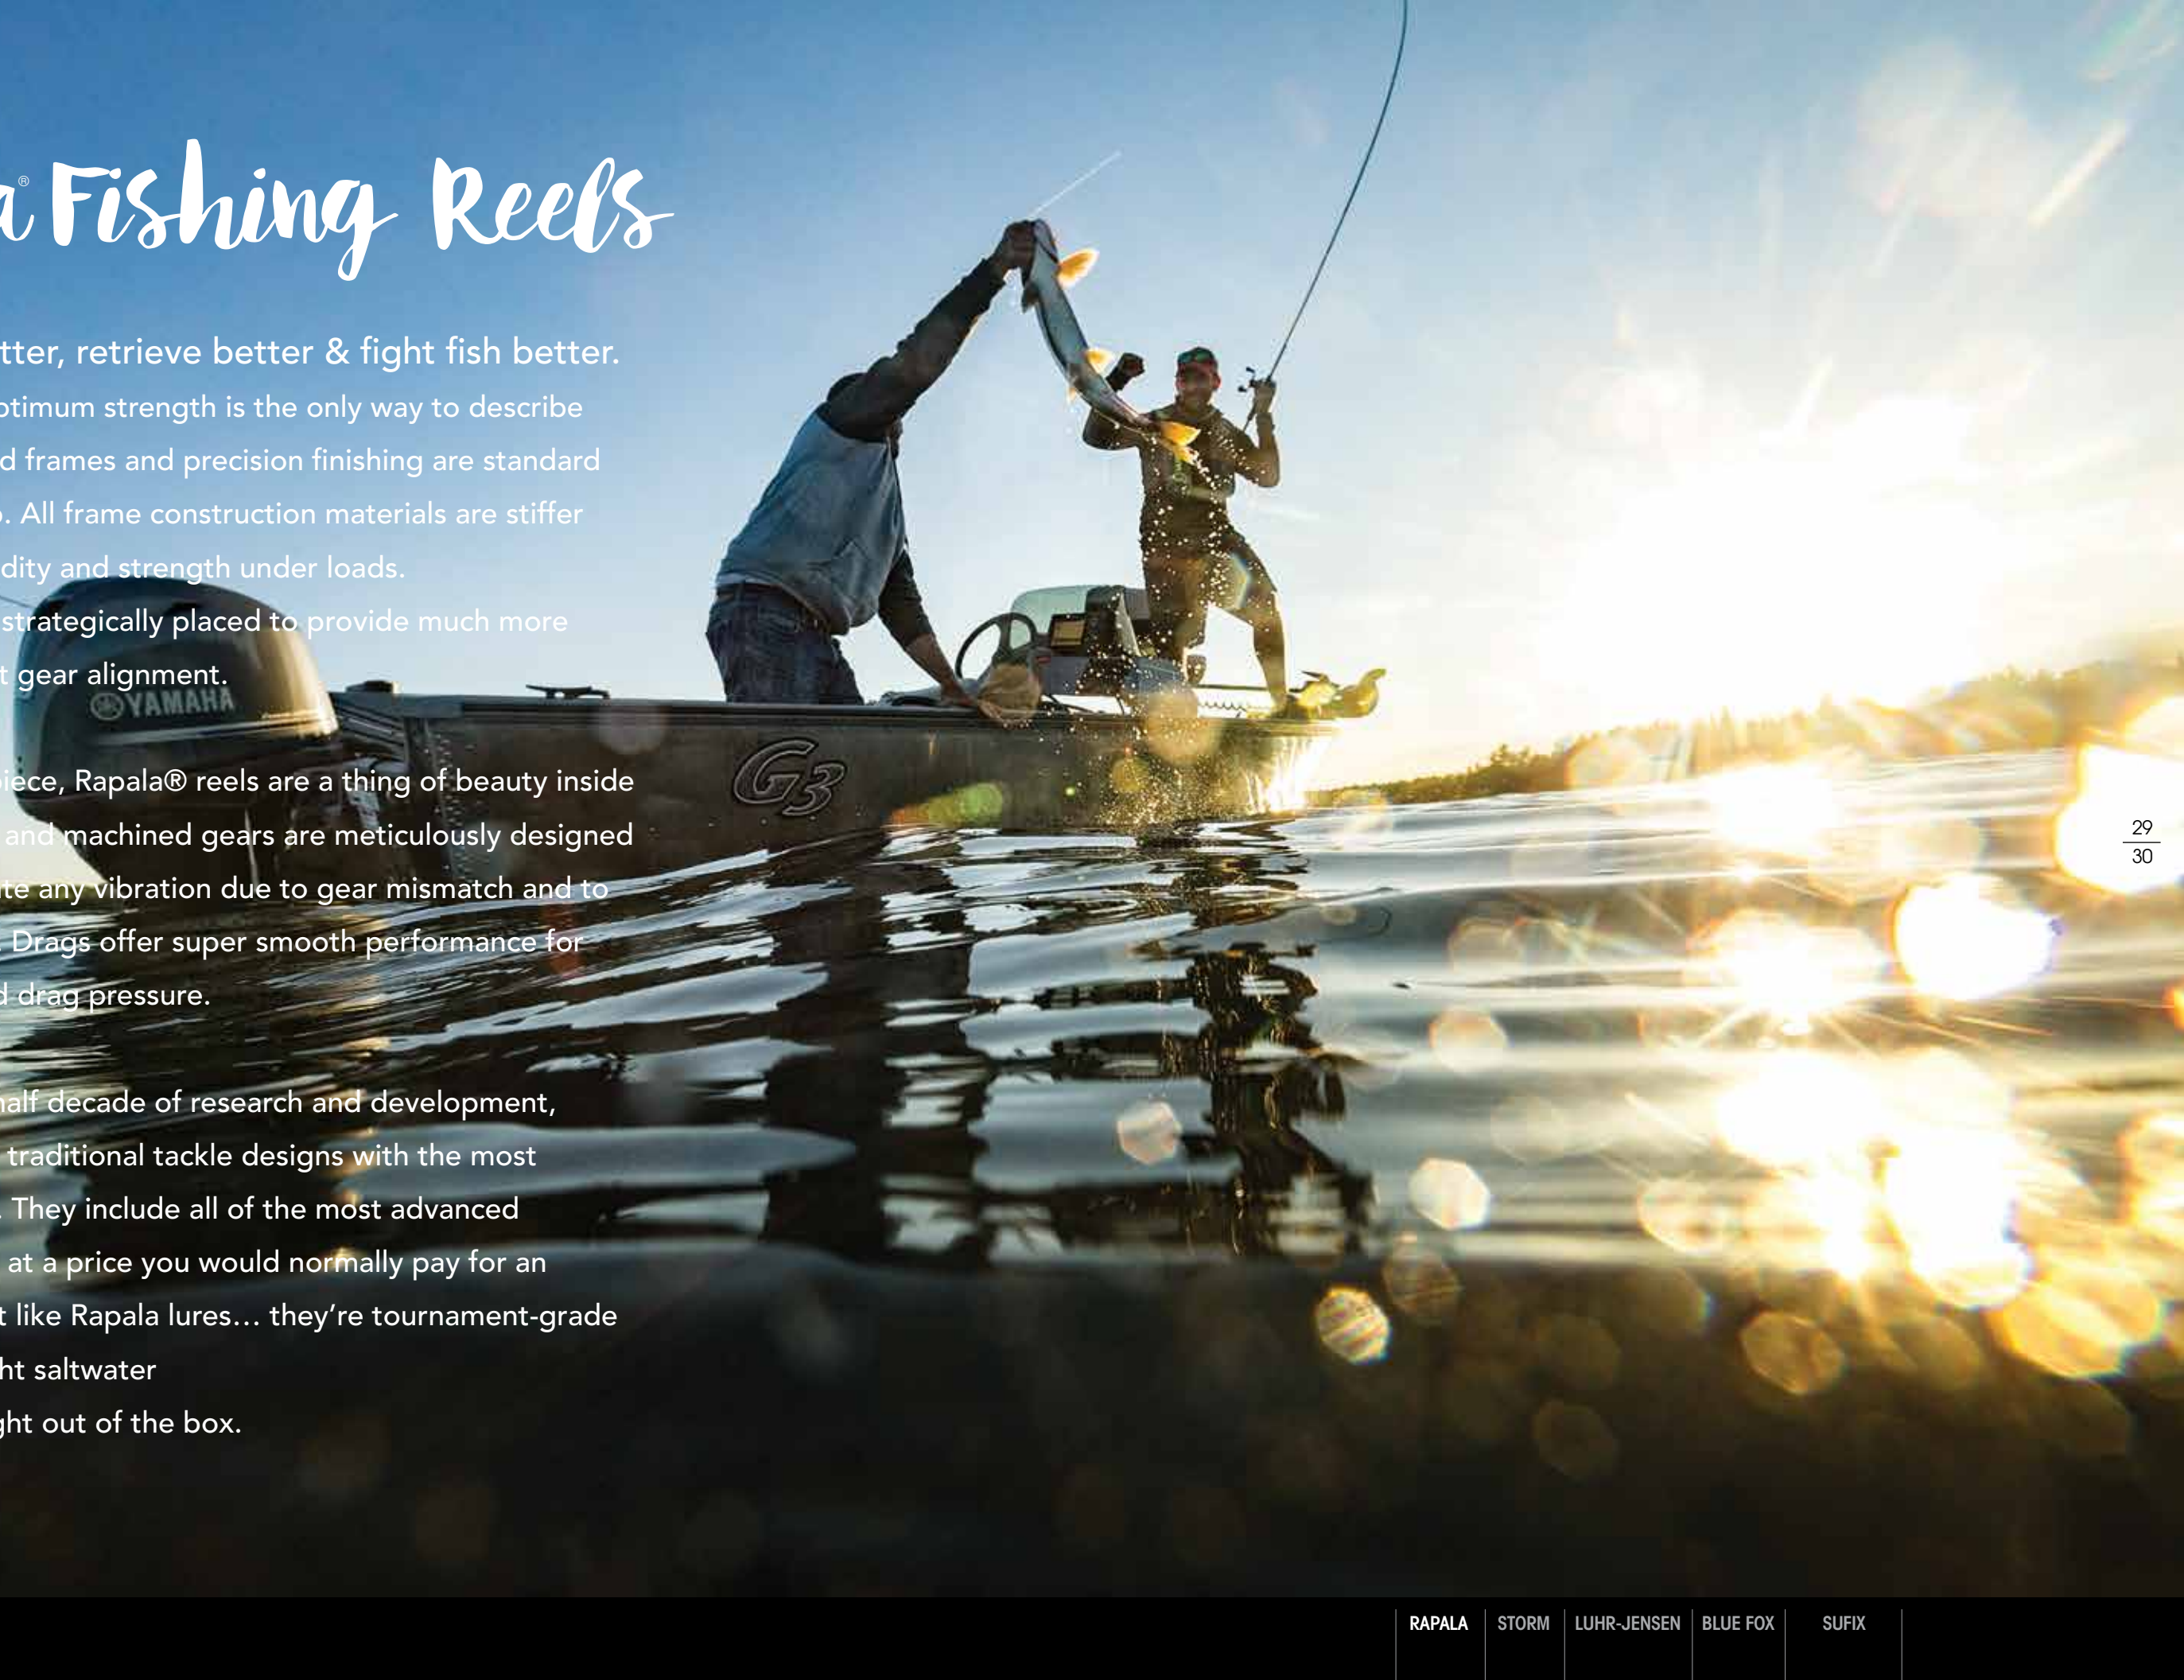

Reels that cast better, retrieve better & fight fish better.

Smooth power and optimum strength is the only way to describe Rapala® reels. Rugged frames and precision finishing are standard throughout the lineup. All frame construction materials are stiffer and provide more rigidity and strength under loads.

Support bearings are strategically placed to provide much more precise and consistent gear alignment.

Like a precision timepiece, Rapala® reels are a thing of beauty inside as well. Die cast main and machined gears are meticulously designed and refined to eliminate any vibration due to gear mismatch and to reduce gear backlash. Drags offer super smooth performance for light line and high end drag pressure.

The culmination of a half decade of research and development, Rapala® reels feature traditional tackle designs with the most advanced technology. They include all of the most advanced performance features at a price you would normally pay for an ordinary reel. And just like Rapala lures... they're tournament-grade for freshwater and light saltwater -- and ready to fish right out of the box.

LUHR-JENSEN

BLUE FOX

SUFIX

TACTICS

DENIM WADING JEANS (10,000MM WATERPROOFNESS)

- Waterproof / Breathable fabric (outer shell 100% polyester; mid layer PU; inner shell 100% nylon)
- Built in gravel guards
- Articulated knees
- Neoprene stocking feet
- Includes wader belt
- Pockets include drain holes

Model No.	Description
RTJG-S, M, L, XL, XXL	Tactics Denim Wading Jeans - Grey

Economical comfort for the wading fisherman. Breathable waders are cool in the summer and remain warm in winter, as all the perspiration evaporates from inside and your thermal layer stays dry and warm. Relaxed fit with articulated knees for added comfort and neoprene socks for durability and warmth. Abrasion resistant gravel guards at ankles to fit over boots. External hand pockets for easy access.

C

Rapala® Canadian Exclusive Fishing Lures!

The world over, big fish eat little fish that swim just like a Rapala. It's that action that started it all. That ability to mimic natural forage and prey in trouble. The slightly off-center, wounded-minnow "wobble" that convinces fish it's an easy target. Panfish to perch, walleye to pike, bass to bass, there are new, fresh choices that proudly carry on our time-tested tradition.

X-RAP® PETO

The Finnish Beast, X-Rap® Peto, combines Rapala's fish-catching X-Rap® construction with a beautifully color matched soft tail to create a seamless hybrid bait. With its slow sink rate and perfectly horizontal fall, X-Rap® Peto is the ideal choice for cold water & challenging conditions. The tail kicks with a wide action when retrieved; or try a jerk & pause allowing the bait to slowly swim into the depths. The soft tail is firmly secured to the body with a 6-point stainless plate. Spare tail included. Fitted with VMC® Coastal Black hooks.

X-RAP® OTUS

A formidable creature, the X-Rap® Otus, combines Rapala's fish-catching X-Rap® construction with a beautifully color matched curl tail to create a seamless hybrid bait. With its slow sink rate and wide wafting tail, X-Rap® Otus is the ideal choice for cold water & challenging conditions. The body rolls side-to-side as the enormous curl tail pulses behind when retrieved. When paused, the tail acts as a parachute, stabilizing the lure as it slowly swims into the depths. The soft tail is firmly secured to the body with a 6-point stainless plate. Spare tail included.

SUPER SHADOW RAP®

Opportunistic predators can't deny the Super Shadow Rap® as it kicks hard to the side, and then slowly fades away into the depths like a dying fish. Its tall body perfectly mimics the silhouette of a big baitfish while the famous Shadow Rap® action dances the Super Shadow Rap® almost on the spot like an easy meal. Twitch it gently for on-the-spot action; or rip it hard to send it gliding into the mouth of a big fish.

RAPALA® LIVE SERIES HD

Talk about “Match the Hatch” to the Extreme. Created in perfect detail, the new advanced Custom HD (High Definition) finishes are the most life-like replicas of nature ever. Look closely: the depth of the finish, the color and scale detailing, the reflection of the classic Rapala foil.

DT Series, Scatter Rap Shad & Scatter Rap Minnow, the Shad Rap plus the Original Floating Minnow are the first to feature this enhancement.

SHADOW RAP® & SHADOW RAP® DEEP

SLOW - SINKING

Designed to perfectly mimic the last struggle of a dying minnow, the Shadow Rap® makes tight turns when twitched, turns to look back and then settles to a head down position with a quiver before starting a slow fade-away dive on the pause. Can be fished almost in place with short twitches, extending the time the lure spends on the strike zone.

CONSTRUCTION
Textured Scale Body
X-Rap Style Finish

FEATURES
Sharp Left to Right Turns
Slow Sinking on Pause

TARGETED SPECIES
Bass, Multi-Species
Gamefish

TERMINAL
VMC®Black Nickel
Round Bend Hooks

Most jerk baits continue on a forward plane with each jerk. Not the Shadow Rap. It kicks almost 180 degrees right then left, so it can be fished nearly in place with very little forward travel, keeping the flickering fade of the Shadow Rap right in a fish’s strike zone. That’s when things really get interesting.

CUSTOM HD PATTERNS

SHADOW RAP® SHAD & SHADOW RAP® SHAD DEEP

SLOW RISING

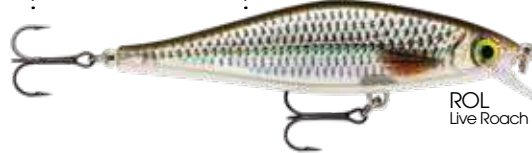

Big fish can't resist the tantalizing, slow-rising action of new Shadow Rap Shad. Swimming with the infamous horizontal struggle with a vertical “rise” on pause, they perfectly mimic a shad in trouble. Larger profile presents more flash and the option to fish from a finesse to more aggressive retrieve. Tie one on and see what monsters are hiding in the darkness.

CONSTRUCTION
Textured Scale Body
Translucent & Frosted Colors

FEATURES
Sharp Left to Right Turns
Slow Rising on Pause

TARGETED SPECIES
Bass, Multi-Species
Gamefish

TERMINAL
VMC®Black Nickel
Round Bend Hooks

The Shadow Rap Shad breaks the mold. Fish it finesse in the morning when the big ones are still a little sleepy, then ramp it up all the way to an aggressive action, matching the mood of the fish. The revolutionary new “frosted” colors absorb light and minimize flash, just right for an enhanced absence of aggressiveness.

The success of Rapala’s Shad Rap® series lies in the simple fact that it mimics the most prolific bait fish found in streams, lakes and rivers around the world far better than any other. The shape, true-to-life colors and classic Rapala action make the Shad Rap a fish-catching machine and a staple in every serious angler’s arsenal. A proven classic, the Shad Rap is a staple around the world and recognized for its consistent fish catching abilities.

CONSTRUCTION	FEATURES	ACTION	TARGETED SPECIES	TERMINAL
Premium Balsa Wood Construction	Natural Bait fish Profile Diving Lip Design Size & Color Choices	Classic Rapala “Wounded-Minnow” Ultra Slow-Super Fast	Multi-Species Freshwater Game fish	VMC® Black Nickel Round Bend Hooks

The “Original Finnish Minnow” is still the number one “go-to” lure. Whether twitched on the top as a surface bait, retrieved as a shallow runner, weighted with a split shot for medium depths or bottom walked off a three-way swivel or bottom-bouncer, the wounded minnow action continues to be irresistible to game fish.

X-RAP®

Rapala® revolutionized jerkbaits when the X-Rap® was introduced. The first lure that could be fished with an aggressive “Slashbait®” technique, and on the next cast be retrieved with the classic Rapala wobble. Nowadays anglers have an X-Rap for every conceivable fishing situation. All X-Rap models are loaded with features from tip to tail, each hand-tuned and tank-tested to ensure top performing action from the very first cast.

RAPALA

STORM

LUHR-JENSEN

BLUE FOX

SUFIX

WELCOME TO UV BRIGHT
Ultraviolet, or UV, lure finishes
are a relatively new addition
to fishing tackle. The premise,

the fact that the vision of many predatory fish includes
the capacity to see this short wavelength light. With a
range of science in hand, many lure manufacturers have
incorporated varied manufacturing processes in order
to position UV lure finishes as necessary to the success
of lures.

The Rapala Product Development Team launched a two
year fact-finding mission to research and test ultraviolet
lure finishes. The resulting release of UV Bright finishes
within Rapala, Storm, Luhr-Jensen and Blue Fox product
lines incorporate research conclusions to deliver anglers
the best components of UV technology. Beginning
with the most successful lure actions available, UV
technology can enhance the visibility of lure finishes
under the greatest range of water conditions.

WEEDLESS SHAD®

RATTLIN MINNOW SPOON®

A totally unique body design combined with a wire-guarded VMC® single hook on the back creates the first truly weedless hard bait. A hard paddle tail gives the lure a wobbling, tail-kicking action with very low resistance. Swims effortlessly through weeds without snagging or picking up trash. When allowed to drop on a tight line, the lure swims slowly down, drawing in bites.

Rattlin' Minnow Spoon features a unique construction that combines the silhouette of a minnow with the action of a spoon. Wide, irregular sweeping action to create flash. Internal rattle chamber emits additional noise and vibration. Built with a heavy duty single hook and a weed guard to be fished even in heavy cover. Balanced flutter on the drop with irregular kicks and strong body roll.

LJ Custom Colors

YES WE DO CUSTOM COLOR ORDERS !

BUILDING A CUSTOM COLOR
Have your vision for a custom lure finish come to life.

- Since custom finishes are built from your local expertise, their presence and success speaks to the quality of your shop. When custom developed finishes take root in a fishery, they cannot be separated from their designer. Contrary to the current climate in which every retailer can add a hot "stock" pattern regardless of who discovered it, the custom finish remains attached to your shop, elevating the strength of your store brand.
- Our sales teams will not pitch your colors to other accounts.
- As seasons change, your store should be moving on to the next hot finish. While you may maintain a few exceptional finishes, NEW finishes drive sales growth.
- Your Luhr Jensen Representative can guide you through the process or help you develop custom finishes based upon your local trends.

THE WORLD'S MOST Hardcore FISHING LINE.

RAPALA STORM LUHR-JENSEN BLUE FOX TERMINATOR SUFIX

GAMAKATSU HISTORY

Gamakatsu started producing sh hooks in 1955. At that time, they were the smallest hook manufacturer in Japan and all of their hooks were made by hand. In 1963 they introduced a new automated heating facility which catapulted them to the forefront of the Japanese market. In 1974, they introduced fully automated hook making machines and found it necessary to build a second factory in order to meet the demand they had created.

In 1976, being well established as the leading Japanese hook manufacturer, Gamakatsu started building a new factory to produce high quality shing rods for the Japanese market.

After upgrading the hook manufacturing machines in 1986, they expanded their product line. As a result, Gamakatsu Co. Ltd became a major manufacturer with a full line of high quality fishing rods, hooks, apparel, and shing related items by 1987.

In 1988, after upgrading the automated tempering facilities and expanding the hook factory, Gamakatsu Co. Ltd opened Gamakatsu International Co., Ltd. in Thailand and Gamakatsu Shantou Co. Ltd. in China in 1989.

When anglers purchase Gamakatsu hooks, they are buying an original product made by GAMAKATSU. Many hook suppliers are using fabricated Japanese sounding names bought from several different manufacturers.

Gamakatsu is the leading fish hook manufacturer in Japan. They are constantly testing new materials, trying to improve their product which already sets the standard for the rest of the industry.

In 1992 Gamakatsu USA Inc. was established to provide Gamakatsu brand hooks to the U.S. market. Obviously, Gamakatsu is well on it’s way of achieving their goal of becoming the market leader in the USA and the world!

Environment has our attention

Since 1955, Gamakatsu has strictly stuck to the theme of “Nature and Technology”. We work hard to develop new, hi-tech products that benet the outdoorsman without adversely effecting the environment.

All over the world

Gamakatsu products are used worldwide. With offices located around the world, Gamakatsu is able to research its markets and develop unique products that meet the needs of even the most demanding anglers.

Gamakatsu’s policy of technical development has always been “the best of quality”. We are always searching for new ways to make our existing products better in addition to constantly looking for unique products which are not yet available. We believe that only this attitude can give our customers the best they deserve!

Invention of hooks

Around 10,000 years ago, the invention of the fish hook marked the beginning of sportfishing. The first hooks were made of wood or bones. As technology improved, so did the hooks. Records show that copper hooks were made in Banchen 7,000 years ago and articial flies were used in Egypt 4,000 years ago. Fishing was also a popular form of entertainment in ancient China.

Today, modern materials and manufacturing techniques have resulted in hundreds of styles of extremely high quality hooks, designed for specic types of fish and fishing methods.

Quality of hooks

Gamakatsu hooks are the corner stone of the Gamakatsu company, and are famous worldwide. Material and technology are what makes these hooks superior to all other brands. The Gamakatsu company, in conjunction with a material manufacturer, developed a material known as High Carbon steel specically for the manufacture of fish hooks. This material not only contains a higher percentage of carbon, but also has very few impurities. As a result, GAMAKATSU has earned Anglers’ trust throughout the world. The life of a fish hook is measured by the sharpness, hardness, and viscosity of the point. Using low quality materials results in points that are weak and not truly sharp. In order to use High Carbon steel, Gamakatsu developed a unique electronic tempering process which enables hooks to be tempered in a stable condition. As a result, Gamakatsu is able to manufacture consistently high quality, extremely sharp hooks in large quantities.

Hook producing

The methods used in creating Gamakatsu hooks is what makes it so superior to all other brands. First, only the most premium grade of high carbon steel is used. This insures against any blemishes in the metal which can weaken the hook.

Secondly, Gamakatsu has the most advanced tempering system in the world. Every hook is heated to the exact temperature that is perfect for that particular style and size then cooled in oil. This process produces hooks which are super strong, but not brittle. It is extremely difficult to achieve a balance between strength and flexibility, and it took many years for Gamakatsu to perfect this process.

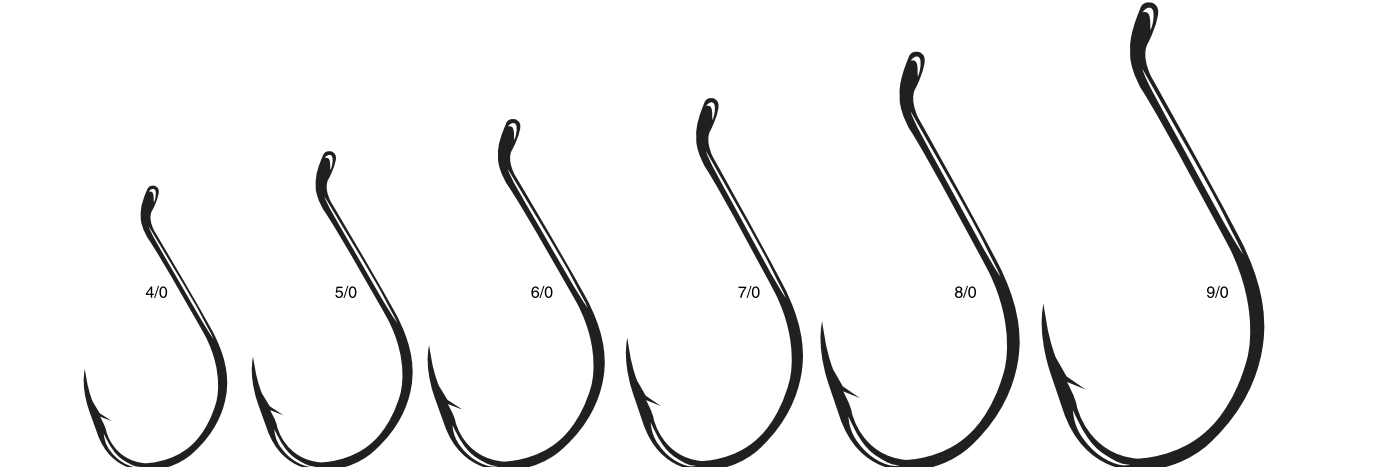

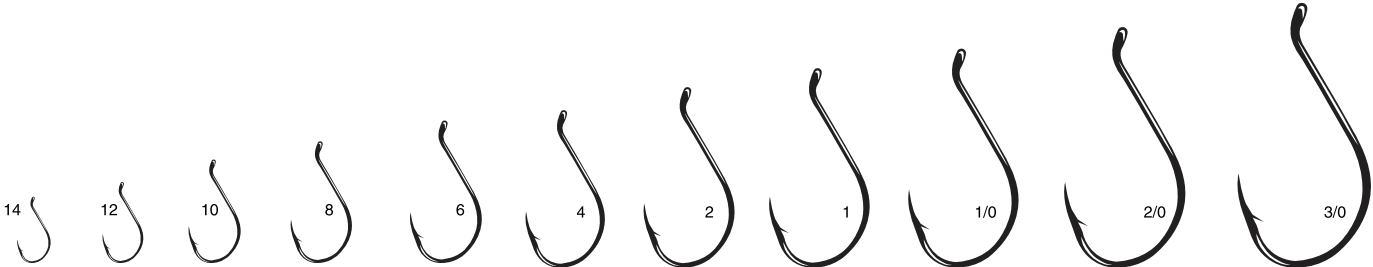

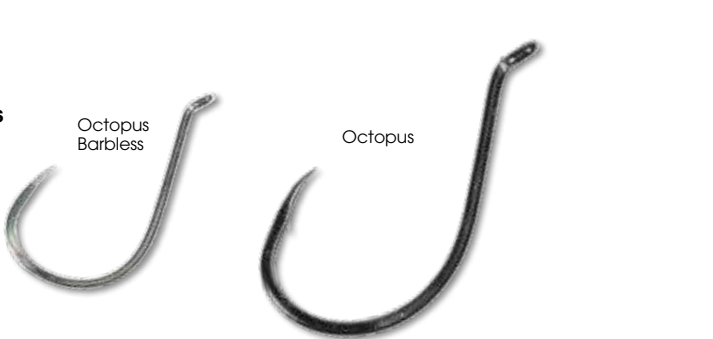

Finally, and perhaps most importantly, our sharpening process is the most modern in the world, and results in a perfectly conical point that is unequaled in sharpness.

Simply the best

Gamakatsu’s dedication to producing the highest quality fish hooks made, as well as the innovation they bring to the industry has kept the company at the forefront of the premium hook market. Gamakatsu makes a hook for any and every fishing situation. So go ahead, tie on a Gamakatsu because it is **“Simply the best!”**

OCTOPUS HOOKS

Our most versatile hook, known for its durability and strength. The Octopus hook comes in a wide variety of colors and finishes including fluorescent.

BIG RIVER BAIT OPEN EYE

The reception of our Big River Bait hook has been so strong that angler’s immediately began asking for a siwash-style hook they could use on spinners, spoons and plugs for salmon. The answer...this fast penetrating hook holds better than conventional hook designs. And when fished barbless (which requires pinching the barb down) it’s the best barbless hook you’ll find. The unique Big River hook design locks fish in place when hooked. Forged for exceptional strength and built Gamakatsu sharp the Big River Open Eye Siwash is sure to make great lures even better.

SPLIT SHOT/DROP SHOT HOOK WEEDLESS

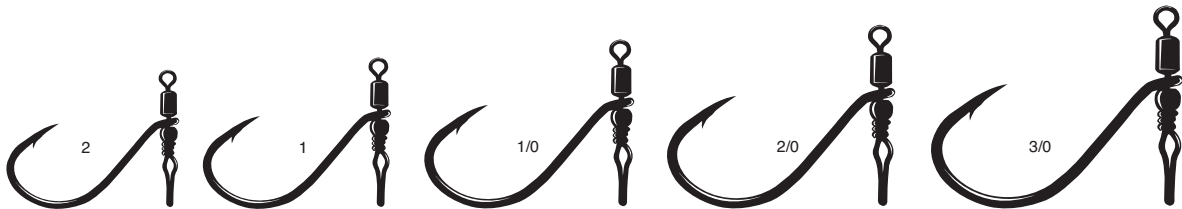

Gamakatsu has done it...again! another fishing hook first with the introduction of the new Weedless Split Shot/Drop Shot Hook. The wide gap hook design is paired to a hair-trigger hand tied, weed-guard for instant hook-ups. The weed guard maintains its shape and consistency fish-after-fish and is ultra-effective in staying weedless with exposed hook riggings.

WACKY HEAD

Gamakatsu is known for it’s innovative and functional designs, the “Wacky Head” jig is no exception. With its unique flat shape, the “Wacky Head” will entice the finickiest of biters with its side to side rolling type action. Also to add to its attraction is the red epoxy head, and a short shank wide gap designed hook.

Model	Qty	Size

JIG HEAD WACKY

Gamakatsu’s Jig Head Wacky is a vast improvement over other wacky jigs. The nickel/titanium weed guard is the first indication that Gamakatsu’s raised the bass fishing bar. This weed guard is small but mighty as it effectively clears hzards yet maintains its shape and rigidity under the most demanding use. The jig head is an improvement as well. Better designed to resist snags the hook eye is recessed to prevent getting hung-up in structure. Even the hook is different, a custom addition that’s based on a shiner hook but modified for the Jig Head Wacky. The result is a much higher ratio of hook-ups and landed fish than any other comparable brand.

SKIPGAP SHAKY HEAD BROWN

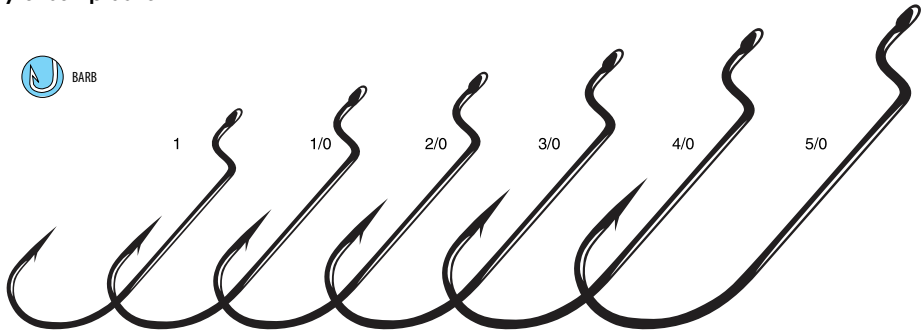

Jig Head or shaky style fishing is a very effective way of finesse fishing for bass. Gamakatsu has developed it’s own jig head based on the Skip Gap worm hook. It has the same innovative bend that holds your bait secure on the hook. There are no barbs or pegs that can tear apart a small finesse worm. The unique bend lends itself to simplicity and will change the way you shaky fish.

HEAVY COVER WORM with WIRE KEEPER

The new standard in Flipping hooks has arrived. The new Heavy Cover Worm hook has been built to the highest standards to fight the biggest fish in the heaviest cover. The Heavy Cover Worm features our rock solid welded eye, perfect for tying a Snell knot with Sufix braid. Gamakatsu has worked with our top pros to design an improved keeper. Instead of a bulky heat shrink barb, the Heavy Cover Worm features a small wire keeper. The keeper has a compact profile and is strategically placed for superior holding power.

Fly Hooks

Gamakatsu has been making premium quality hooks since 1955. Every hook is made using Gamakatsu’s own high quality, high carbon steel and is meticulously crafted to the highest of standards. Unlike other hook manufacturers, Gamakatsu hooks are made in their own facility which is one of the most technologically advanced in the world and their consistency is unmatched.

Executive Series

Executive Series fly hooks offers some very unique designs like the R10B Retainer Bend and the C13U Keel Balance. Hooks like the S10 series of hooks have beak points that allow for effortless penetration, especially with light tippets and a slightly wider gap. They also have a shank length just a little longer than standard dry fly hooks. While the R10B and C13U are matte black, the B10S Stinger hooks and the rest of the Executive series have a beautiful NS Black finish that not only looks good, but is also very corrosion resistant. There’s no other hook series like it.

Traditional Series

The Traditional Series hooks are mostly all bronze finished, have needle points, and are designed to match up in style and size with other popular hook brands. The key difference being the quality of the steel used in them and the sharpness of the hook. Traditional Series hooks also feature the traditional Salmon/Steelhead tapered loop up eye hooks, but in non-traditional finishes like Red in addition to the traditional NS Black finish. The styles all match, but the quality is unmatched.

Executive Series

“the most advanced fly hook available”

- Corrosion Resistant N.S. Black Finish
- Beak Points
- Unique Designs

Traditional Series

“A necessity for patterns of time honored tradition”

- Traditional Sizing
- Traditional Bronze Finish
- Gamakatsu Strength and Sharpness

Saltwater Series

“The most complete line of salt water hooks”

- Corrosion Resistant Tin Finish
- Nine styles to choose from
- Innovative designs

R17-B • Fly Hook Retainer Bend Barbless 3X Fine

Gamakatsu's R17-B fly hook is proof positive that big things can be achieved in small pack-ages. A barbless trout hook, the R17-B features Gamakatsu's exclusive Nano Smooth Coat™ technology. This coating enhances penetration for reliable, solid and immediate hook-ups. The combination of a wide gap design, 3X fine wire material, the slightly curved shank and barbless retainer bend (that slight crook at the bottom of the hook bend), add-up to fewer fish lost and better hook-ups on this exceptionally strong, small, fine wire hook series.

Double 22 Medium Shank

Medium shank length designed with a straight eye manufactured in durable Nickel Silver Black. Gamakatsu Double 22 is a high carbon steel double hook. With the increased use of tube flies the Double 22 is perfect for match for salmon flies. In addition the Double 22 will be a welcome addition amongst bass fisherman as a stinger hook on swim baits and belly hook on hard baits.
