Pro-Troll®
Fishing and Marine 2021
E-CHIP® ™
INSIDE

About Pro-Troll®

Founded in 1978, Pro-Troll Inc. creates and markets innovative fishing and marine products and is a leading developer of technology-driven fishing tackle. Its proprietary fish attraction device, the EChip, replicates in lures the electrical nerve discharge of bait. Pro-Troll sells its technology and products in the U.S. and globally in Scandinavia, Germany, Australia, New Zealand, France, Russia, Chile and Canada. Pro-Troll is privately owned and is based in the San Francisco, California area. The company has factory representatives around the world.

Pro-Troll is involved in the development, production and sales of a number of fishing lures and marine products. One of the strengths of the company is its engineering staff which is working on a number of new high-tech products including enhancements to its existing items.

Pro-Troll is a strong advocate of fisheries restoration and makes every effort to support those organizations that work to restore our fisheries. We are members of the American Sportfishing Association, The Northwest Sportfishing Industry Alliance, the Golden State Salmon Association, Water4Fish.org and numerous other non-profit groups. We sincerely thank the millions of fishermen who use and support our products. We are always open for comments, ideas and suggestions.

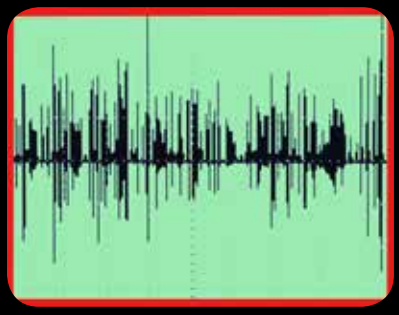
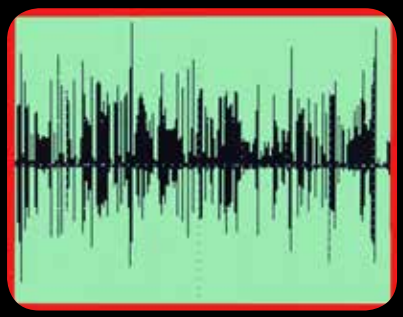
The Pro-Troll EChip®

The Pro-Troll Electronic EChip has revolutionized fishing. When it is mounted on a wiggling lure or attractor, it discharges a two millivolt pulse which matches the nerve pulse of a wounded bait fish. Gamefish are attracted and they will strike.



Typical nerve discharge of a baitfish



Discharge of the EChip

There are two EChip Sizes 3/4" for small lures and 1" for large lures

Scientists Confirm that Fish use 5 Sensory Systems to Feed

- *Sight - fish have good eyesight but don't see well in poor conditions or at close range.*
- *Cloudy water, dirty water and deep dark water inhibit sight.*
- *Smell - Important for some fish but scent trails are narrow and inaccurate for catching prey.*
- *Sound - Sound travels fast in water but it is very inaccurate for predators at close range.*
- *Vibration - Critical for general attraction to a region but it is also inaccurate at close range.*
- *Electro Sensitivity - Critical for triggering strikes and enabling fish to exactly locate and strike their prey.*

While sight, smell and sound bring fish to an area, Electro-Location is the primary tool fish use to determine what and where to strike. Used by over one million anglers worldwide, the EChip attracts More Fish and Bigger Fish.

EChip Kits are available in different sizes and configurations

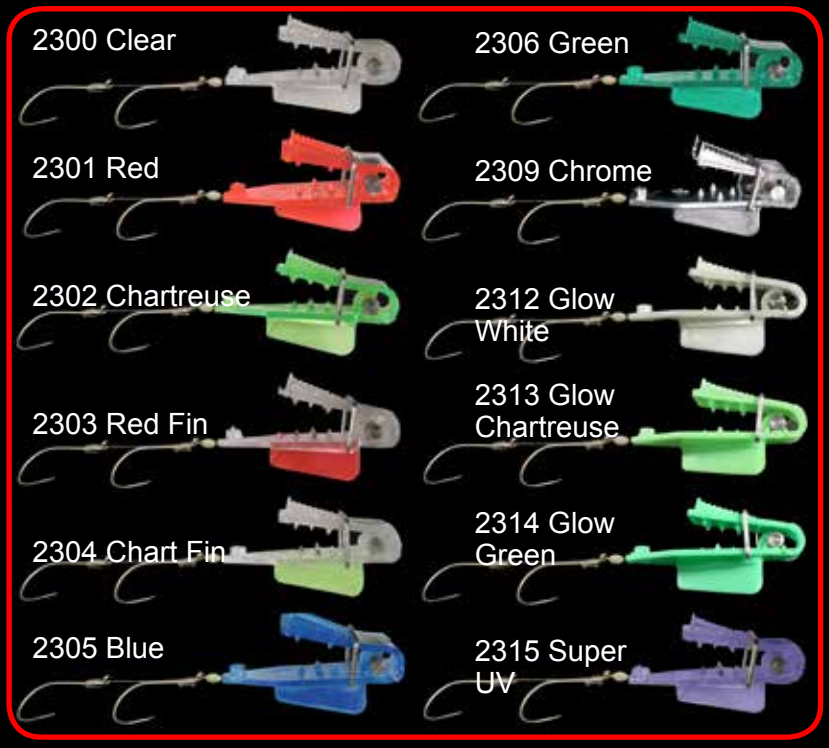
Electronic Bait Holders

E-Rotary

For bait or strip 4" to 4.5" long
Single 5/0 Barbed hook

Roto Chip Size 5A

Bait 4" to 4.5" long
Two 5/0 barbless hooks



World class bait holders for unmatched fish catching ability

- *The EChip provides "live bait" nerve pulses*
- *Diagonal fin on the back provides rotation*
- *Offset hook position changes the rotation to a non-uniform "wounded bait" action*
- *Easy open slide lock for quick setup and firm grip*
- *Works well fished by itself or behind a flasher*

Size 5A and 5B

The Roto Chip Size 5 head is 3/4" wide. For bait or strip 4" to 4.5" long, use the regular 5A fin model. For bait 5" or more, use the Big Fin 5B (2500 series)

Size 1

The Roto Chip Size 1 head is 1/2" wide. This model is made to hold shad or minnows from 2" to 2.5" long. The size 1 Roto Chips (2100 series) come in most of the same colors as the 5A models shown on the left.

Pro-Troll Products (925)-825-8560

Bait Holders

Rotary Salmon Killer
Original non-EChip model

For bait or strip 4" to 4.5" long
Head opens manually
Single 5/0 Barbed hook
40-lb 7-foot leader
Unique hook holder
No toothpicks needed

"I have tested the EChip on a variety of baits, spoons and flashers. There is no question that it catches more fish. On one extended trip I caught salmon 4 to 1 over non-EChip setups."
John Keizer
Tacoma, Washington

Big Fin E-Rotary Bait Holder
5/0 Hook and EChip -5B

For bait or strip 5" to 7" long
- *Easy open slide lock*
- *Single 5/0 Barbed hook*
- *40-lb 7-foot leader*

Unrigged Heads

Unrigged E-Rotary and Roto Chip Heads are available in most colors in packs of three

The 4300 series covers the regular fin size and the 4500 series covers the big fin size

A 2 1/2" Threadfin Shad mounted in the Size 1 Roto Chip Shad Roller

A 4 1/2" Anchovy mounted in the size 5A Roto Chip

The Winners Circle

These professionals have gone over and above for Pro-Troll

Benita Galland, Coeur D' Alene, Idaho
A salmon advocate, teacher and community leader. "The Pro-Troll flashers have paid huge dividends for me in Coeur D' Alene Lake and in the Columbia River".

Capt. James Netzel, Tight Lines Guide Service Northern California. www.fishtightlines.com
"The Pro-Troll ProChip 11 flasher is tops on my list for catching Chinooks in the Sacramento River".

Capt. Ernie Lantiegne, Fish Doctor Charters, Mexico NY. www.fishdoctorcharters.com
"I have worked with and helped Pro-Troll for many years in the evolution of their flasher innovations. With each step, my catches have improved".

Capt John Keizer, Salt Patrol, Tacoma Washington. www.saltpatrol.com *"No question, Pro-Troll makes the best flashers on the market. Their lighted flashers were a stroke of genius. My catch has doubled" .*

John Martinis, John's Sporting Goods, Everett Washington. www.johnssportinggoods.com
"Pro-Troll lighted flashers are truly a revolution in salmon fishing. At the end of the day the only statistic that matters is the number in the box. I choose to start my day with Pro-Troll".

Capt. Rich Nau, Praying Mantis Sportfishing, Pulaski, NY www.prayingmantissportfishing.com
"The Pro-Troll EChip flashers are " Second to None" and have been the "Top Producer" year after year for over 25 years on Lake Ontario".

Fish N Chip Flashers®

In 2016, Pro-Troll introduced this patented unique flasher. It has a fish shaped body and the curved tail provides a steady rotation. The diagonal fin on the back provides the same kick as the famous Pro-Troll ProChip 11 360 flasher.

Bill Taylor of Osprey Guide Adventures, www.ospreyguideadventures.com, has developed several special Pro-Troll rigging techniques for fall and spring-run salmon in the Oregon rivers using the Fish N Chip flashers.

The Black Box Electronic Fish Attractor

DOES YOUR BOAT ATTRACT FISH OR SCARE THEM AWAY?

100% of Boats Send an Electrical Voltage into the water around the boat

98% of Anglers Don't Know What Voltage their Boat Sends Into the water

The Other 2% of Anglers Catch MORE FISH & BIGGER FISH

THE BLACK BOX #1500

- Commercial Grade
- Proven Technology
- Simple Installation
- Controls up to six downriggers
- Easy to Use
- Great Warranty
- Reasonable in Price

The Pro-Troll Black Box is the most advanced unit on the market. It is unmatched in its control circuits.

The Electronic Fish Magnet

The Black Box tells you what voltage your boat sends into the water - and it tunes the voltage so your boat actually attracts fish.

"Commercial Fishermen Would Never Fish Without The Black Box"

Non-Downrigger Boats Listen Up!
The Pro-Troll Transom Mount Kit is Available

Bass Boats! River Boats! Avoid spooking fish

A piece of cable stretched across the transom replaces the need for a downrigger

- *Barrel 9 3/4" Long & 1 1/2" Diameter*

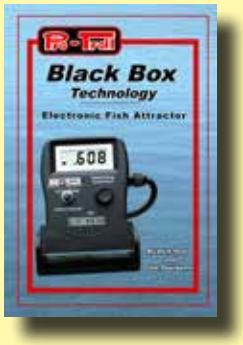
Books

#3004

Downrigger Fishing Techniques
by Dick Pool

The most comprehensive and widely read downrigger book ever assembled. Dick Pool designed and developed downriggers for over 20 years. The book is packed with information that will help you choose the right downrigger for your boat. In addition, it gives you weight recommendations and rigging tricks. Loaded with photos, diagrams and tips.

#1506



Black Box Techniques
by Dick Pool & Joe Spurgeon

Every boat is surrounded by a weak electrical charge in the water. This book explains how this electric field affects your fishing and what you can do about it. Simple tests are explained to see if your boat is attracting or repelling fish. "Hot" boats are common and many fishermen go for years not knowing why they are not catching fish. Get the facts from two engineers that have researched the subject for years.
