TECHNICAL SUPERIORITY BUILT ON LEGENDARY HERITAGE

**IN THE MIDST OF THE
MID-1800s RECESSION,
MUSTAD, A NAIL AND
WIRE PRODUCER IN
GJØVIK, NORWAY, HAD
AN IDEA THAT WOULD
CHANGE THE WORLD
OF FISHING FOREVER.**

By 1877, the “Hook Maker” was turning raw steel wire into high-quality hooks, completely changing the way fishing hooks are manufactured. To avoid having their innovative machine copied by competitors, Mustad encrypted the blueprints and kept the machine’s location secret. They even prevented certain factory workers from speaking to one another, even going as far as to having them eat their lunches in separate rooms.

There was a reason for the extreme secrecy. The Mustad Hook Maker worked, and allowed the company to take over the market with higher quality hooks at lower prices. More than 60,000 types of hooks were gathered from across the world for the Hook Maker to recreate. Stronger, cheaper versions of them were returned to fishermen in every corner of the globe.

Innovation, quality and a pioneering spirit have led to Mustad becoming the largest hook producer in the world. Today, Mustad can be found in over 160 countries around the globe. In many of those countries, the name “Mustad” translates to “fishing hook.”

MUSTAD VALUES

PIONEERS

A pioneering spirit guides design, product innovation, and on-the-water expertise.

SUSTAINABILITY

We are in a business that is directly linked to the welfare of the ocean, lakes, rivers, and waterways.

EXCELLENCE

Define excellence through a constant level of quality over time. Quality in our product and the storytelling of each day on the water.

PASSION

Passion is at the core of all things Mustad; passion for the pursuit, conservation, and education of all things fishing.

TO OUR VALUED CUSTOMERS

Fishing is in our blood. Just like you, we commit ourselves every day to improving our craft. By staying on the cutting edge of technology, we continue to rewrite the playbook on hook, lure and gear design.

With the launch of our new Triangle Hook in 2019, we broke the mold yet again. In 2020, we intend to do the same.

Each year, we recommit ourselves to you, our customer, identifying what you need to find success in any waters. By partnering with great trend setters like Kevin VanDam, Capt. Nick Stanczyk and the crews at Local Knowledge and Addicted Fishing, we're reaching out to the top anglers in the world to ensure you've got what you need to be on top of your game.

For 2020, we've held nothing back. From inshore and offshore to bass, we're launching hundreds of new, innovative products to keep you hooked up to your favorite species. Your success is our success. And making you a more effective angler will always be our priority.

This year, we're adding the new InkVader, Vertical Jigs and Triangle Hooks to our saltwater line. In salmon, trout and steelhead, we partnered with Addicted Fishing to bring you our new synthetic Steelhead Jigs, Worm Jig Heads, Salmon Twitching Jigs and a series of species and tactic-specific floats. For the bass fanatic, we've introduced a line of lures including our new Skatter Shad, Underspin Shad and Tungsten TitanX weights. Last, but definitely not least, we've got an entirely new lineup of tools and knives to make sure you're prepared before, during and after the catch.

We're proud to call you our customer and fans, and we're committed now, more than ever, to help ensure your success on the water. From all of us here at Mustad, thank you for letting us play a part in your passion.

Tight lines,

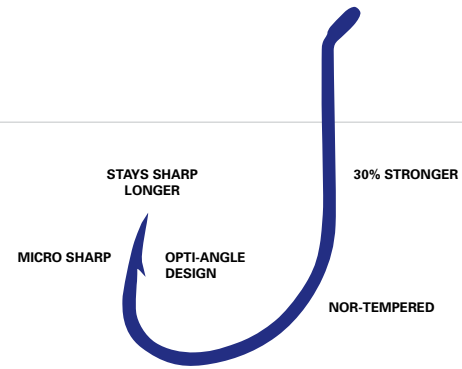

Jordan Davis

ULTRAPPOINT®

Mustad's UltraPoint® Technology ensures incredible sharpness without compromising strength. UltraPoint® hooks are 20% sharper and designed to stay sharper longer, so you can keep casting without changing lures or sharpening hooks.

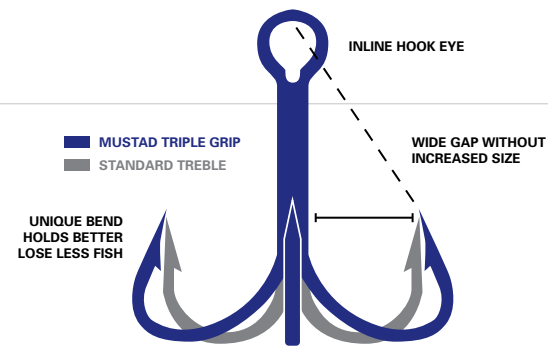

GRIP-PIN®

Mustad Grip-Pin® Technology is designed with a molded resin pin that securely anchors a wide range of baits to the hook for a "no slip, no slide" design that extends the life of your bait.

TRIPLE GRIP®

Mustad Triple Grip® hooks combine exceptional hooking and holding capability with outstanding strength. They feature a precise shape that almost "locks" a fish into the elbow of the bend, making it virtually impossible for the fish to throw the hook.

NOR-TEMPERED

Mustad Nor-Tempering is 30% stronger than standard wire without being brittle. No broken points means more fish caught.

TRIANGLE

Mustad Triangle Hooks have reinvented the fishing hook with a proprietary 3-Way optimized forging process that is 20% stronger than a round wire hook and prevents rolling in the mouth of a hooked fish. This means stronger hook shanks and stronger sets.

THE WORLD'S MOST ACCOMPLISHED ANGLER TRUSTS MUSTAD.

KEVIN VANDAM

For more than 25 years, the biggest name in bass fishing has trusted his success to Mustad.

Proving himself with more tournament wins than anyone else in bass fishing, including four Bassmaster Classics, there is no one who knows more about angling than bass fishing Hall of Famer KVD. His expertise and feedback are invaluable to Mustad as we continually improve our products and look for new ways to solve problems faced by anglers across the world.

We thank KVD for his allegiance to Mustad and his unmatched performance in the world of bass fishing. We're honored to be a small part of his incredible career.

MUSTAD CORE VALUE: SUSTAINABILITY

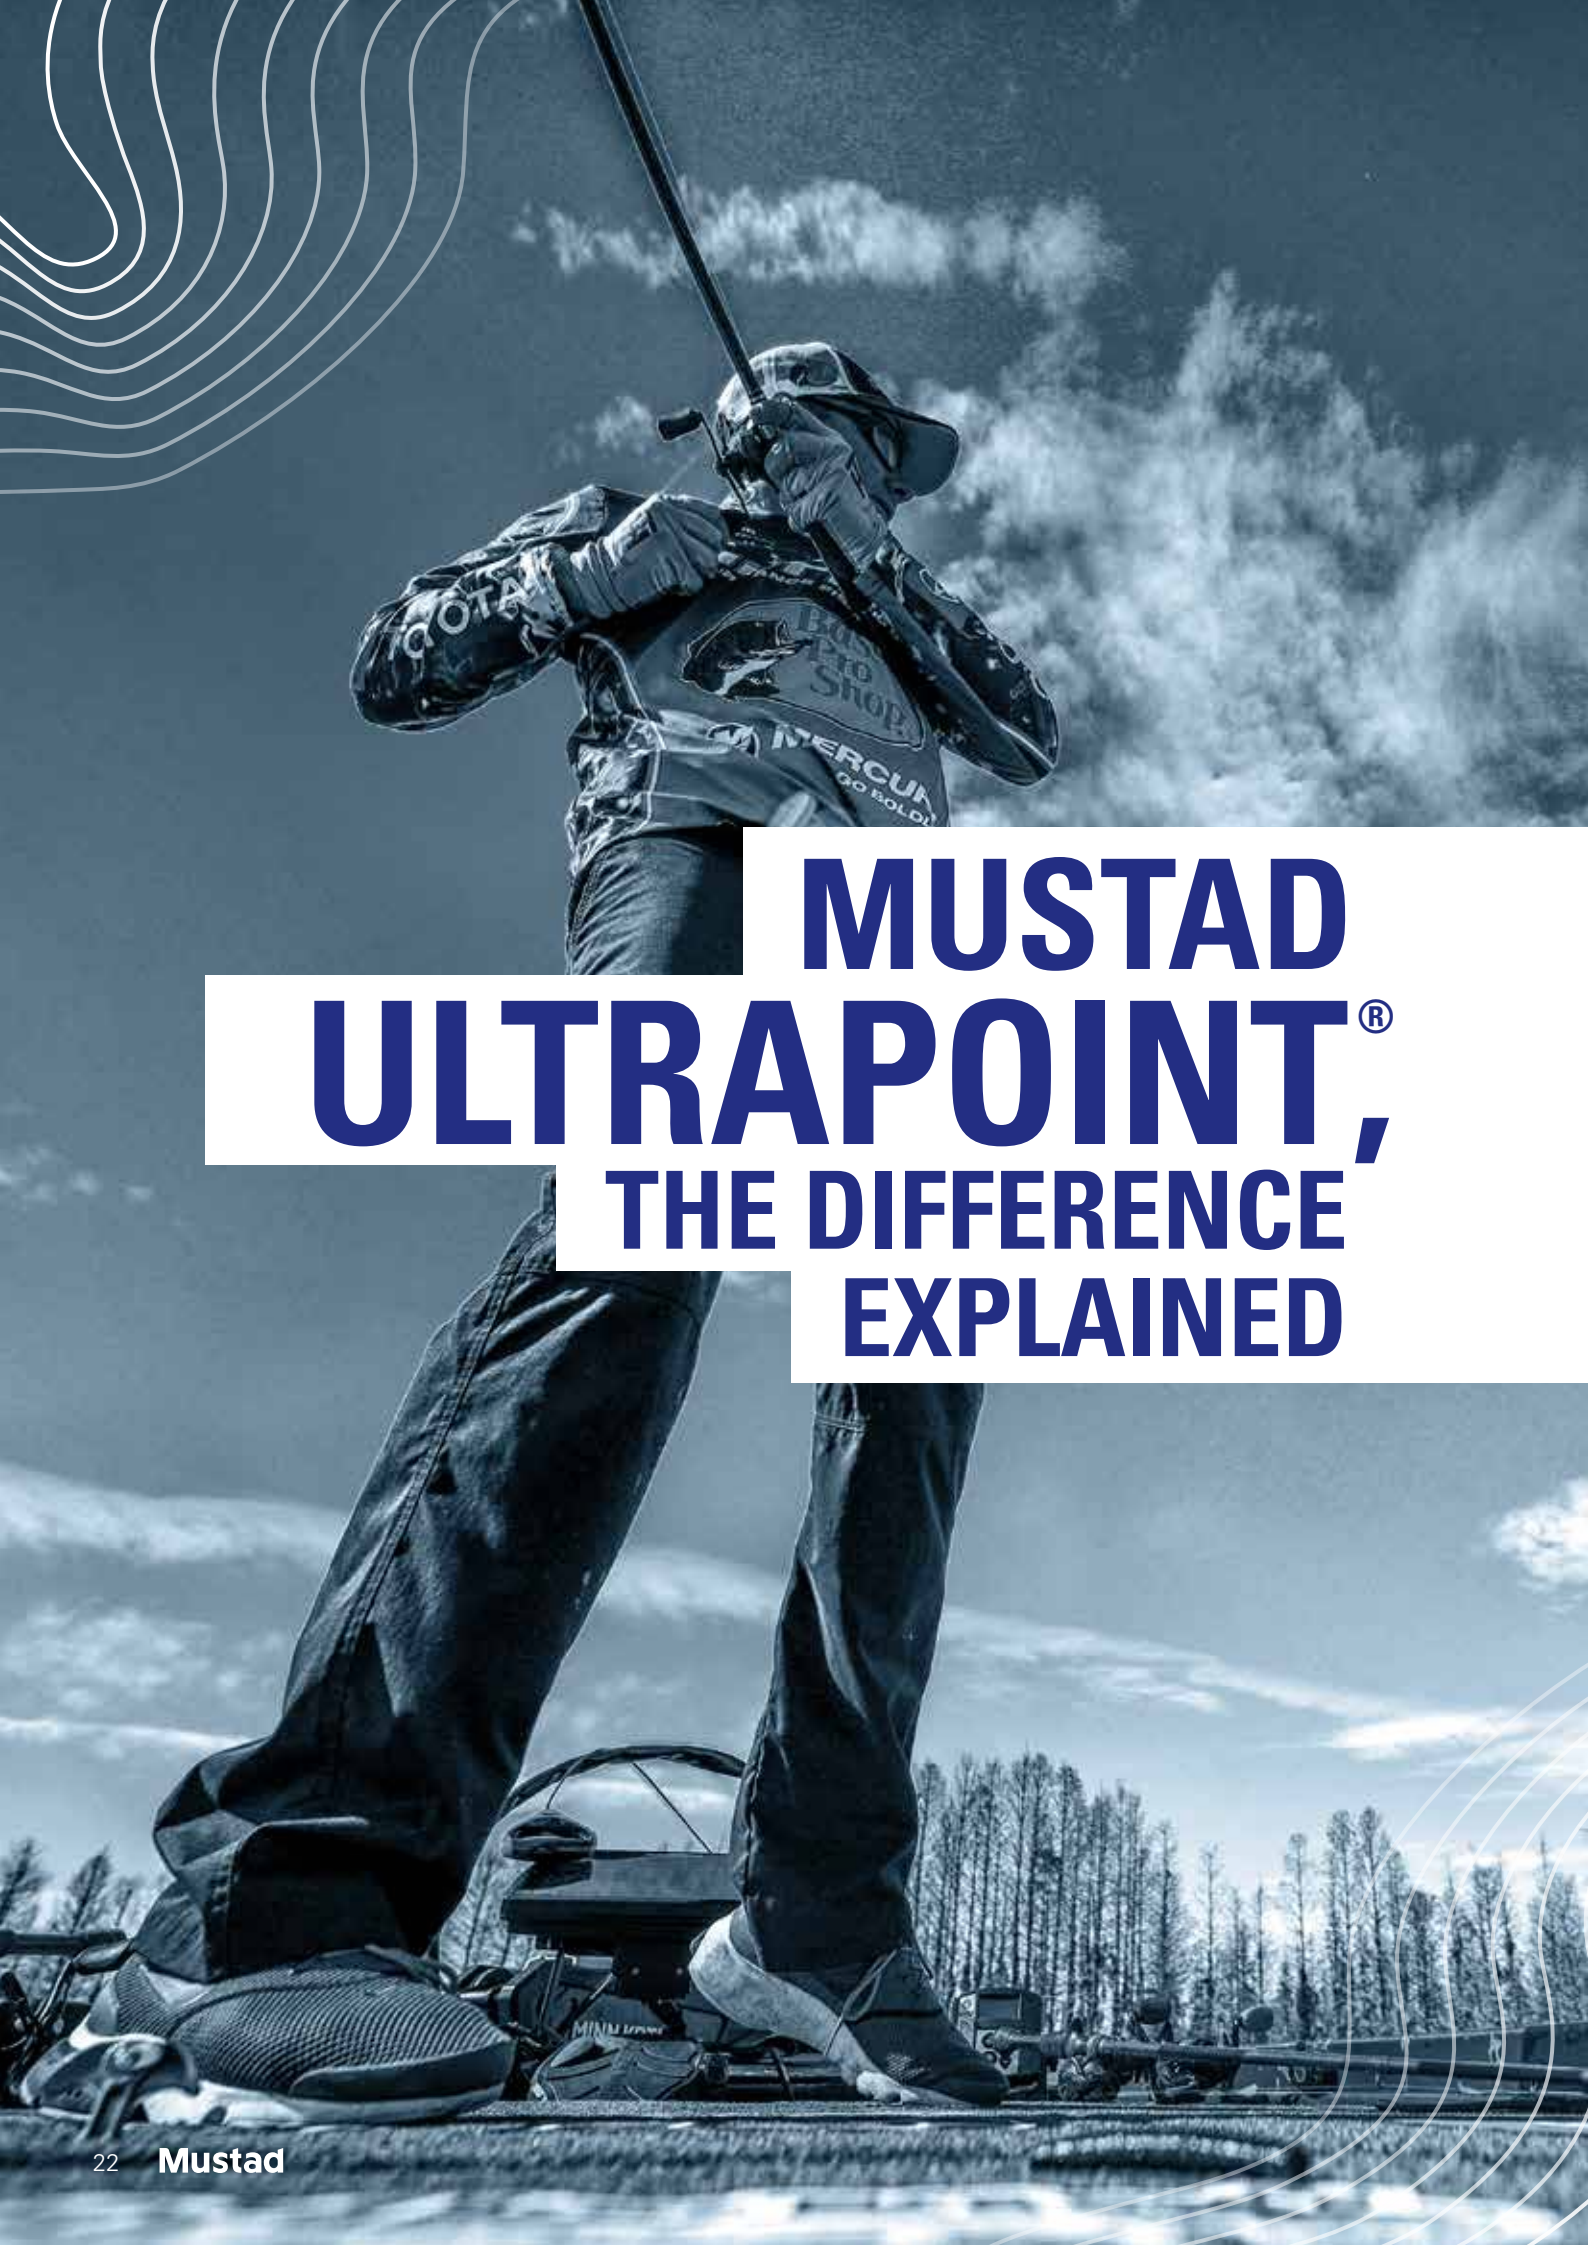

THE FUTURE OF OUR OCEANS - OUR ROLE

The recreational fishing industry is intimately linked to the welfare of our oceans, lakes and rivers. As both industry leaders and passionate anglers, we are actively working to help address sustainability challenges, rather than contributing to them.

To measure our progress towards becoming a more sustainable and responsible business, we have identified several United Nations Sustainable Development Goals as priority areas for action; these include Goal 14 - 'Life below water' and Goal 15 - 'Life on land' (including freshwater ecosystems).

We are working collaboratively on various sustainability projects aimed at reducing our impact on the environment and becoming good stewards for future generations.

MUSTAD ULTRAPPOINT,[®] THE DIFFERENCE EXPLAINED

ULTRAPPOINT[®] STAYS SHARPER LONGER

ULTRAPPOINT[®] IS MUSTAD'S TOP OF THE LINE HOOK RANGE

In 1998, Denny Brauer won the Bassmaster Classic on the first UltraPoint[®] Hooks and the rest is history. Mustad prostaffers took home the Bassmaster Classic Trophy the first 4 out of 5 years, and UltraPoint[®] has been credited in at least 9 Bassmaster Classic victories since then. No other hook company has even come close.

Having a good sharp point that stays sharp makes a big difference in the amount of time fishing and not changing lures or sharpening hooks. It all adds up and can make the difference between catching, and... well, not catching.

UltraPoint[®] Technology was invented by Mustad with one purpose: to make Hooks Stay Sharper Longer. Whether you're fishing for Bass, Tarpon, Tuna, or any other species, one of the most critical parts of fishing is your hook point. Many hook points start sharp but easily roll or break, especially when fishing around structure like docks, rocks, gravel stumps, and for big fish with tough bony jaws.

The most advanced technologies come together to produce UltraPoint[®] hooks. Mustad hooks have an enduring reputation for legendary strength and consistency, and this is no coincidence. First, Mustad is the only hook company in the world that owns and operates our own wire manufacturing facility, in continuous operation in Norway since 1832. Having production on our home ground makes it possible to control all processes and produce the highest possible quality. Mustad is the only hook manufacturer controlling all phases of production from wire to finish.

4.3 MICROSHARP POINT TECHNOLOGY

UltraPoint[®] is created using state-of-the-art, three stage Opti-Angle[™] sharpening technology which removes less metal from the point than traditional methods – without compromising sharpness. The point length is engineered to the optimum ratio for maximum sharpness and strength. UltraPoint[®] hooks are 20% sharper and designed to stay sharper longer.

MUSTAD TRIANGLE HOOKS

MUSTAD TRIANGLE HOOK CONCEPT, THE ULTIMATE BALANCE OF FUNCTIONAL STRENGTH AND LEADING EDGE DESIGN TECHNOLOGY.

It is not easy to come up with new breakthrough ideas in a fishing hook, but in 2016 the departure from traditional round hook wire was born. Mustad's Triangle Concept (MTC) was initiated as a project to build a wire that would not wiggle in the mouth of a hooked fish like round wire. Utilizing three flat surfaces in a triangular shape to give a more steady hold.

Reminiscent of the awe inspiring angles of stealth technology, Mustad's Triangle Concept Hook design is constructed using a proprietary 3-Way optimized forging process that yields 10% more strength than traditional wire. The high strength triangular hook shank transitions seamlessly into perfectly tapered round wire, and terminates into welded ring for maximum knot security.

Mustad® Triangle Hooks feature two point technologies, Mustad's flagship UltraPoint® and new Triangle Point, the sharpest and longest lasting points of their kind. Further enhancing the design and construction features, Mustad® Triangle Wire hooks are finished in either new advanced Mustad® T-Steel – a non-reflective low visibility finish with unparalleled saltwater corrosion resistance; or Mustad® TitanX® non-reflective, low-visibility, slippery smooth, nanotech finish.

From a simple glance, the shape, lines, and finish tell you this is a hook like no other; Mustad's design and engineering team has clearly achieved the most advanced design technology ever built into a fish hook!

Triangle Hooks are packed in an exclusive box made from sustainable materials.

THE PRO'S SECRET

Designed, Tested & Proven By Top Walleye Tournament Pros

TO RIG

Attach a bottom-bouncer weight to your main line. Add a 4-6 foot, 10 lb monofilament leader and attach hook. Thread half a night crawler up the hook shank over the hook eye. There should be 1/4" to 1/2" of night crawler hanging off the hook.

TO FISH

Use your trolling motor and keep speeds from 1 mph to almost nothing. The key is to keep just enough speed so the crawler spins. Can also be used effectively when drifting.

APPLICATIONS

This is a versatile, year-round Power Finesse presentation. It can be fished fast or slow, has the attractiveness of live bait and adds an irresistible action. The unique design creates an enticing corkscrew presentation. This is a slow bottom bouncing presentation technique that lets you present the bait in cracks, crevices and little corners that faster blade presentations skip over.

UNIQUE GRIPPER DESIGN
is easy to use;
holds bait securely

TO MOVE: Unique sliding weight lets you easily change presentations.

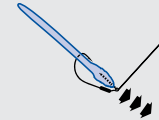

1. Rotate weight several times to heat silicone insert.

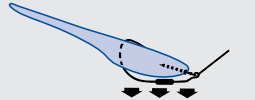

2. Move weight to desired location. As insert cools, weight will be held firmly in place.

Weight Back:
Pushes bait backwards under structures like docks or logs. Use with tube baits, crawfish, and jerkbaits.

Weight Forward:
Bait sinks "nose down." Use with worms, "Gidzit" and tube baits.

Weight Centered:
Bait falls horizontally. Use with jerk baits, tube baits, lizards and worms.

RINGED HOOKS RIGGING ILLUSTRATIONS

Hooks rigged with action rings allow live bait such as sardines, anchovies and mackerel to swim more naturally than on a fixed hook. This draws more strikes on a slow bite and helps you boat more fish.

BACK OR NECK HOOKING

For larger baits like sardines and mackerel, hook crosswise behind the head. The bait stays lively and the hook stays secure for casting. Then the exposed point doesn't foul in the bait, which results in increased hookups. Some anglers prefer to move the hook rearward and hook the bait under the dorsal fin to provide a better anchor point.

BUTT, ANAL OR TAIL HOOKING

Hook just behind vent and just inside anal fin. Helps your bait swim downward and away from the boat quickly. Since the hook is embedded in soft tissue, a light lob or underhand cast works best to keep the bait on the hook.

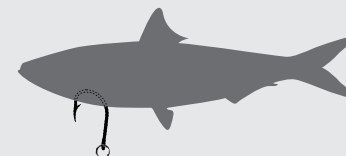

COLLAR HOOKING

Preferred method for anchovies and also used for small sardines. Bait is hooked through the collarbone immediately behind the gill plates. This method helps to keep small baits lively and swimming just under the surface.

HEART OR CHEST HOOKING

Hook shallow, crosswise through the breastbone or under pectoral fins. Don't hook too deep. Popular when fishing larger live baits, like brownbaits, near or on the bottom with a sinker.

NOSE HOOKING

Hook bait either crosswise through the nose or up through both lips. Harder tissue in the nose means your bait is less likely to come off during casting. Also allows swimming the bait back to the boat.

BAIT PRESENTATIONS

BEAK/OCTOPUS HOOK

Wide gap allows bait to swim freely. In-line turned up eye provides great leverage for power hook-sets. Use heavier wire hooks for bigger fish. Lighter wire hooks allow more natural bait presentation.

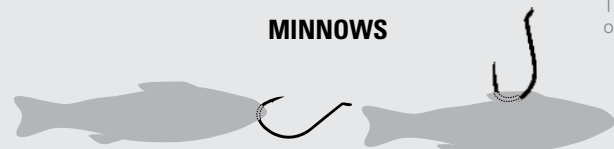

LEECHES

Thread hook through sucker.

NIGHTCRAWLERS

Thread hook through band.

MINNOWS

Casting—Thread hook point through bottom and top of mouth.

Bobber—Thread hook under dorsal fin.

Thread on a piece, leaving one end free.

SIGNATURE FLY

The most technically advanced hooks on the water. Together with the world's top fly tiers, we've created the sharpest, strongest hooks. Signature Fly Hooks also feature an exclusive benefit of fully proportional sizing of gap, length, and individual wire sizing across each hook series. Technology means tight lines.

- Suitable for both inshore and offshore fishing

Will be in stock Fall 2019

INKVADER® LURE SYSTEM

The Mustad InkVader is a revolutionary TPE octopus soft bait that is built to look and move exactly like a live octopus, even squirting non-toxic and soluble ink from tablets that can be added to the head cavity. Whether you're bouncing it off the bottom, slow trolling or slow pitch jigging, the InkVader is the closest you'll ever get to the real thing.

Complete the illusion with octopus-scented ink tablets that are non-toxic and water soluble.

Water activated tabs provide 8 continuous minutes of ink release for long lasting affect for multiple drops.

Designed alongside the Addicted Fishing team in the Pacific Northwest, the new Mustad & Addicted Hootchie Twitching Jigs utilize high-quality squid skirts with an assist-style coated cable setback hook located at the ideal position for solid hooksets. Each jig offers Mustad's UltraPoint technology that keeps the hook point sharper longer.

MUSTAD JIGS

THESE JIGS ARE INJECTION-MOLDED, DRESSED WITH JAPANESE HOT STAMPING FOIL, AND FINISHED WITH UV REFLECTIVE PAINT ON THE BACK ALONG WITH GLOW-IN-THE-DARK LUMO PAINT ON THE BELLY. MUSTAD JIGGING ASSIST RIGS ARE EQUIPPED WITH MUSTAD ULTRAPPOINT JIGGING HOOKS AND GIVEN AN EDGE WITH JAPANESE QUALITY UV TINSELS AND FLASH PAPER. LOADED WITH TOOLS AT THIS LEVEL, YOU'LL NEVER MISS OUT ON A BITE.

The new Rip Roller Slow Fall Jig is built with a slim, streamlined profile for quick descent on a tight line. Its centered weight gives it a stable, but rapid rolling action on a slack line. Two contrasting colors on each side create a blinking flash that triggers strikes. Perfect for deep fish or heavy current!

The new Staggerbod Slow Fall Jig is designed to move with a highly unpredictable stagger to mimic an injured baitfish. Multiple angled faces catch the drift effortlessly and flutter even in slow current. The reverse face is precisely saddled to create a natural keel that maintains balance.

The new Wingman Slow Fall Jig offers multiple presentation possibilities depending on where blades or assist rigs are attached using the revolutionary Mustad Fastach Clip. The Wingman can create a stable, head-down descent with deadly flutter, a random tumble, conventional slow-pitch action or a wide, side-to-side wobble.

The new Tracershot Jig is designed to match the hatch for pelagic baitfish presentations, whether you're casting inshore or offshore. Its aerodynamic profile allows for easy casting and its streamlined body reacts quickly to slight movements of the rod tip.

MUSTAD ZIPPY JIG

The Zippy Jig is bottom weighted for long-distance casting from the shore or the boat, targeting pelagic species like tuna or jacks. The wider profile causes the Zippy Jig to flutter on the drop, drawing the attention of fish patrolling the shoreline. When it's retrieved quickly, it skips on the water like disoriented baitfish fleeing for its life.

MUSTAD DAGGERMAN JIG

MJIG02

The Daggerman Jig is a front-weighted vertical jig designed to target aggressive predators like amberjack, yellowtail and Dogtooth tuna. The Daggerman is best presented in short, rapid pumps with short pauses in between. Its aerodynamic shape helps the Daggerman rip through the water column, drawing the attention of nearby predators and resembling the natural movement of a struggling baitfish.

The Moonriser Jig is a highly versatile, front-weighted jig that attracts many different species with its slim profile. Its streamlined design helps it cut through the water with little resistance, allowing the angler to jig in deeper water or near structures like wrecks. Slower and longer strokes allow the angler to continuously jig for longer, increasing the chance of a strike.

Utilizing Ultrapoint hooks, UV fibers and jig heads, Mustad partnered with team Addicted to create the one-of-a-kind Salmon Twitching Jig. High-end fly fishing brushes tied specifically to target Pacific Northwest species like salmon, steelhead and trout. Think bass fishing techniques and action, but for salmon during their swim upriver.

The next evolution of the vibrating jig craze, this revolutionary new design features a reversed blade with a specialized blade pivot system that creates a highly erratic action and a bubble trail that drives predator fish wild. The patented connection from blade to head gives the bait an awesome side-to-side searching action. With a double plastic keeper collar and an exclusive TitanX spinnerbait hook, premium skirts, weedless hook protector and Mustad's new mean eye design, the Skatter Shad is sure to set a new standard in the market.

JIG HEADS

With legendary Mustad UltraPoint® technology, our jig heads are built to stay sharper longer, with a hook angle perfectly crafted to ensure solid hookups. These jig heads cast far, fall fast and provide fish catching action.

"We're super excited about collaborating with Mustad on the new Addicted Fishing lineup of products specifically designed for Pacific Northwest fisheries – salmon, steelhead, walleye. We can't wait to bring you guys some awesome new products."

UNDERSPIN SHAD

Mustad's popular shad darter-style head with a built-in underpin is a versatile, clear water fish catcher. Features a highly detailed fit and finish with nickel-coated blades and a customized "mean eye" design. The precise ball bearing swivel maximizes underwater action and the double bait keeper ensures your plastics stay where they belong.

FASTACH™ WEIGHTS

The Mustad Fastach system makes hook and bait changes quick and easy. Simply twist off your hook for express bait changing out on the water. The Fastach jig system gives your bait super natural movements in the water and works on all modern soft baits. Works great with the Mustad Grip-pin series of hooks for ultimate action and reliability.

JIGGING ASSIST RIGS

Mustad offers a comprehensive range of options for vertical jigging tactics, featuring four rig styles in a combination of sizes to match a variety of techniques, including light, slow pitch, vertical, and heavy jigging. Along with high quality UltraPoint hooks, we only use the best PE and Kevlar materials to produce these rigs. All rigs come dressed with either tinsel, reflective paper, or glow beads for added flash.
