DOUBLE-STRUCTURE FLUOROCARBON

TATSU® BEST COMBINATION OF STRENGTH & CASTABILITY

TATSU – Japanese for Dragon – delivers an amazingly strong, yet supple, fluorocarbon line unlike any other through a superior, state-of-the-art double-structure process. It fuses two custom, 100% fluorocarbon resins, creating the world's only double-structure main line. Fill your spool with TATSU and fish **fierce**.

STS SALMON & TROUT/ STEELHEAD LEADER MATERIAL

STRONG & HIGHLY ABRASION RESISTANT

Tough fish. Rocks and wicked structure. No problem. This genuine 100% fluorocarbon leader material delivers incredible abrasion resistance, maximum impact and knot strength, all with a smaller line diameter than monofilament. This fast-sinking line gets you in the “strike zone” quicker, and with a lower refractive index than monofilament, it is significantly less visible underwater.

Move over mono – now you’ve got the optimum choice for targeting Salmon, Trout and Steelhead.

MLF PRO CIRCUIT ANGLER

NEW TACTX™ PRECISION CASTING, 4-STRAND CAMO BRAID

Performance features make this braid a perfect choice for everyday anglers. TactX is engineered to maintain its perfectly round shape and stay firm to minimize rod tip wrapping and wind knots. It packs tightly on your reel without cutting into itself to help reduce backlashes too. This is an all-round braid that combines excellent castability, abrasion resistance and overall strength with a “pebble” texture to add durability and help it cut through vegetation. It’s woven from multi-color earth-tone strands that are heat-set for better color retention and to create a natural camo color that reduces line visibility.

GOLD LABEL

OUR THINNEST LEADER* FOR STEALTHIER PRESENTATIONS

Not only are thinner leaders even less visible underwater, but you also get the advantage of more natural presentations and better catch-rates on finicky fish. Made with our exclusive double-structure process, we combine two custom Seaguar fluorocarbon resins to create a leader with smaller diameters yet with exceptional knot and tensile strength. It's softer too and cinches easily for fail-safe knots.

EVERY LINE. FOR EVERYBODY.

We owe a lot to the pro anglers, charter captains and fishing guides who helped pioneer the use of Seaguar fluorocarbon lines from the day we invented them in 1971. And, for more than 50 years, our mission has been driven by the creation of premium, high-performance products that help anglers catch more fish.

We're also looking forward to serving the millions of anglers who are either fishing for the first time, getting reacquainted with the sport or managing a tight budget. That's why we are introducing BasiX Fluorocarbon and TactX Braid as part of our Seaguar 101 debut. For anglers keeping a tight eye on their spending, these value-packed lines get you fishing genuine Seaguar in a budget friendly way.

So now, whether you're on top of your game, perfecting your game or just getting your game started, there's a Seaguar line that's right for you. We know every cast counts and we will continue to support all anglers with lines and leaders that are....

Always the Best.
